3 or more clusters of residents/staff have had new respiratory symptoms within 72 hours of each other since last update	0
Total Employees with Positive Tests To Date	68
Visitation Reopening projection (pending no new cases)	

General Note: "Employees" includes our own employees and contracted individuals (including visiting professionals) that serve either Cedarbrook that become positive of whom we are made aware.

Cedarbrook is following the guidance and direction of federal, state and local agencies and public health officials. Cedarbrook continues to update procedures and practices with the evolving federal / state guidance that very understandably often changes as the nation continues to study and understand this novel virus. Cedarbrook will continue (among multiple other practices) performing the following mitigation strategies: operate under DOH/CMS visitation regulations, minimize cross-unit movement as much as operationally possible, continued suspension of normalized group dining per visitation guidelines, engage in only very small scale activities depending on unit zone designation, utilize paper products for meals on Covid units, continue high touch surface cleaning/sanitizing in addition to regular cleaning, screen all upon entry to the facility, regularly confer with public health individuals and the new PA RRHCP onsite assistance, offer residents technology options for family contact, periodic education, postings, and updates for staff, using elevated PPE like N95s as much as possible at all times on units, and working vigorously for PPE and testing supplies in this unprecedented time period.
