**General Note: "Employees" includes our own employees and contracted individuals (including visiting professionals) that serve either Cedarbrook that become positive of whom we are made aware.**

Cedarbrook is following the guidance and direction of federal, state and local agencies and public health officials. Cedarbrook continues to update procedures and practices with the evolving federal / state guidance that very understandably often changes as the nation continues to study and understand this novel virus. Cedarbrook will continue (among multiple other practices) performing the following mitigation strategies: allowing "Green Zone" visitation off-unit to minimize risk; minimize cross-unit movement as much as operationally possible; continued suspension of normalized group dining; engage in only very small scale activities depending on unit zone designation; utilize paper products for meals on Covid units; continue high touch surface cleaning/sanitizing in addition to regular cleaning; screen all upon entry to the facility; confer with public health experts as needed; offer residents technology options for family contact if unable to have in-person or window visits; periodic education, postings, and updates for staff; maintaining appropriate PPE supplies and guidelines; universal Covid-19 testing per recommendations; and maintain proper zoning of the facility using Green, Yellow, and Red criteria based on testing and known exposures.
